# TOKENOMICS

Golden XRP is specifically designed to handsomely reward the loyalty of its golden holders, who are showered with gold, in this case significant dividends in XRP (on the Binance smart chain). Thus providing a lucrative passive income stream far superior to the competition.

This is a revolutionary yield-generating contract that investors will flock to. Loyal golden holders will generate significant XRP dividends from the day traders, panic sellers and pump & dumpers who drive the volume.

Just like owning conventional stocks, you will profit twice fold, though with the high trade volume associated with crypto, at an exponential rate. You earn dividends by holding Golden XRP & your initial capital investment will grow in relation to the market cap as this token goes viral with the elaborate marketing plan in store.

The token contract applies a binary rewards system - 15% on every transaction & 23% on sales is redistributed. The redistribution is allocated as such:
